Groundwater Quality Funding Program SB 445 Site Cleanup Subaccount Program (SCAP) Update June 2016

The Site Cleanup Subaccount Program (SCAP) Pre-Applications are accepted on a continuous basis and evaluated regularly. SCAP communicates with applicants and the appropriate regulatory agencies in its evaluation of project eligibility. SCAP applicants will be invited to provide additional information regarding eligibility, including responsible party financial information, and proposed detailed scope of work, cost estimates, and schedule as part of the Project Execution Plan (PEP). As proposed projects are approved, they will be posted on the State Water Board website at:

http://www.waterboards.ca.gov/water_issues/programs/grants_loans/scap/. Approved projects will enter the grant agreement process for grant execution.

To kick off SCAP, a “first round” of tentative projects is moving toward approval and grant execution. There are no prescribed funding cycles, so projects are only informally referred to as rounds.

If you have any questions about the Groundwater Quality Funding Programs, your application or eligibility, contact us at:
